

Data Analytics Week-4 Capstone Project Summary

The dashboard provides an overview of the company's sales and profitability across different products, countries, business segments, and time periods. The company generated approximately **118.73M in total sales** and **16.89M in total profit**, with an overall **profit margin of around 14.23%**. The **Government segment** contributes the highest share of sales, while **Paseo** is one of the strongest-performing products in terms of sales. The dashboard also shows a significant increase in sales from **2013 to 2014**. Monthly sales vary throughout the year, with some months performing considerably better than others. The interactive filters allow stakeholders to analyse performance by year, country, product, and segment and make better business decisions.
